What you can expect from us

npower's guaranteed standards of performance

Plus electricity distribution company and gas transporter standards of performance
Appointments

When we make an appointment to visit your home, whether for a meter inspection or something else, we'll ensure it is within a reasonable timeframe and that we stick to it. You'll be given a four-hour time slot between Monday to Friday 8am to 8pm, or on Saturday or Sunday between 9am and 5pm. These hours may change due to public holidays. We may be able to give you a two-hour time slot if you ask for one.

Of course, any representative of npower who comes to your home will have the necessary skills and experience to carry out the task in hand.

These standards apply to appointments made with both domestic and non-domestic (microbusiness) customers.

If we don't keep our appointment
You'll receive £30 in compensation if for any reason we can't make your appointment, or if we cancel or rearrange it with less than one working day’s notice without your consent.

We don't have to make a payment where we cancel an appointment relating to:
· the installation of a prepayment meter or the disconnection of your supply to recover a debt,
· fixing a faulty prepayment meter, or
· the reconnection of your supply cut off for non-payment of a debt that you have now paid or agreed to pay.

If your credit meter is faulty
If you think there’s a problem with your meter, get in touch with us as soon as you can. We’ll check for any faults within five working days of you contacting us. This may involve a visit to your home, but we’ll let you know in advance if it does. If we can’t solve the problem immediately, we’ll complete the work within a timescale that we’ve both agreed to.

You’re entitled to £30 compensation if we don’t follow the above.

The above standard applies to domestic customers only.

If your prepayment meter is faulty
Give us a call as soon as you can if you think there’s a problem with your prepayment meter. We’ll look into the problem within three hours if you phone us Monday to Friday 8am to 8pm, (excluding bank holidays), or within four hours if you call on Saturday, Sunday or a bank holiday from 9am to 5pm.

We’ll try to identify the problem remotely, but we may have to visit your home to find out what’s causing it. If we can’t fix it on the spot, we’ll agree a timescale with you for completing the job.

You’ll receive £30 in compensation if we don’t follow these standards.

The standard set out above applies to domestic customers only.
Reconnecting your supply.

We never want to disconnect your energy supply, but we may have to do this after a certain amount of time if you haven’t paid your bill or got in touch to talk to us about it. Remember, you can always give us a call to discuss your payment options.

We’ll reconnect your supply within 24 hours* if you do one of the following:

• Pay your outstanding bills in full
• Agree with us a repayment plan (which will take into account how much you can realistically afford)
• Agree to have a prepayment meter installed in your home as long as it’s suitable for you – and for the meter to be set to collect the amount you owe in affordable weekly instalments.

You’ll receive £30 compensation if we don’t follow the above.

The standard set out above applies to domestic customers only.

*If you pay your outstanding bills in full outside of working hours (Monday to Friday 8am to 8pm, Saturday and Sunday 9am to 5pm) the 24 hours for reconnection begins at the start of the next day’s working hours.

Erroneous transfers

The vast majority of customers who want to change supplier do so without any problems, but sometimes problems can occur. An ‘erroneous transfer’ is when a supplier incorrectly takes over a customer’s supply without their permission.

When you contact us, or the other supplier involved, to say you believe you’ve been transferred without a valid contract, we’ll work with the other supplier to agree whether the switch is valid. We’ll agree this within 20 working days of your initial contact. You’ll receive £30 in compensation from each supplier if this doesn’t happen.

Within 20 working days of your initial contact, the supplier you contacted will either confirm that you’ll be returned to your old supplier via the erroneous transfer process, or will provide a statement of the outcome of the investigation if we’ve agreed with the other supplier that no erroneous transfer has taken place. You’ll receive £30 in compensation from the supplier you contacted if this doesn’t happen.

When it’s been confirmed that an erroneous transfer has taken place, your supply will be returned to the old supplier within 21 working days of the erroneous transfer being agreed. You’ll receive £30 in compensation from the old supplier if this doesn’t happen.

These standards apply to domestic customers only, for switches initiated on or after 1 May 2019.

Credit balances

If we close your account because you’ve changed to another supplier, we’ll return any credit balance on your account within 10 working days of issuing your final bill.

You’ll receive £30 in compensation if we don’t.

This standard applies to domestic customers only, for switches initiated on or after 1 May 2019.
Exceptions

It’s important that we’re upfront and clear with you about when compensation payments are due and when they’re not. That’s why we want to clearly set out the exceptions to the compensation statements made above.

- Only one compensation payment of £30 will be made for an ongoing failure.
- If we don’t fulfil our promise of paying compensation within 10 working days, we’re only required to make one extra payment of £30.
- If we fail to keep to an agreed appointment, only one compensation payment will be made – even if there’s a delay due to events outside our control.
- Compensation for failing to return a credit balance promptly may not be due if we don’t have enough information to process a refund (e.g. an incomplete or incorrect postal or email address), if a formal dispute is ongoing between us (about the amount of the credit balance or the method for refunding it) or if there is a delay due to events outside our control.

Other reasons why compensation may not be paid include:

- If you’re already in a dispute with us over whether you’re owed compensation.
- If you don’t allow us to enter your home when we’ve agreed an appointment slot with you, or if we can’t gain access for any reason.
- If you tell us not to visit your home to check on a faulty credit or prepayment meter.
- If you ask us not to take action over a new problem, or to stop taking action over an ongoing one.
- If we’re reason to believe that you requested an appointment/call-out for a faulty meter despite knowing that there wasn’t an issue with it.
- If your meter has been deliberately interfered with or damaged by you or somebody else.
- If something happens that’s outside our control (and we’ve taken all reasonable steps to prevent it occurring or to prevent us from not being able to meet the standard).
- Severe weather.
- If you have outstanding bills to pay which are overdue (for which we could disconnect your property).
- If completing necessary work would mean breaking the law.
- If we use the erroneous transfer process to return your account to your old supplier when you’ve exercised your right to cancel the transfer within 14 days.
- If we transfer your supply via the ‘supplier of last resort’ process (this is where the energy regulator Ofgem directs a supplier to take over responsibility for the customers of a failed supplier).
- If something happens that’s outside our control, (e.g. where a contacted supplier takes longer than 20 working days to contact us about a possible erroneous transfer).
- If you have another fuel with us and that account has an outstanding balance, we may transfer a credit balance to that account rather than send you a refund.

Compensation payments from npower

You’ll receive any compensation that we owe you within 10 working days of the original failure on our part. You’ll receive another £30 within 10 working days if you don’t receive the above compensation in time. This doesn’t apply to any payments relating to meter disputes.

Disputes

If you disagree and cannot reach agreement with us about whether you should receive a payment, you may refer the case to the Ofgem, the gas and electricity regulator, to request a formal decision.

In line with Section 39(4) of the Electricity Act 1989 and 33A(5) of the Gas Act 1986, any guaranteed standard payments you receive will not prejudice your entitlement to any other remedy or action that may be open to you because of our failure.

Getting compensation from your electricity distribution company and gas transporter

Sometimes you may be owed compensation by your electricity distribution company or gas transporter, e.g. if there’s a power cut and it’s their fault. If they owe you compensation, they’ll pass on the money to us and we’ll ensure you get it within 10 working days of when we receive it.

You’ll receive £30 compensation if we don’t do this, in addition to any money owed to you by the electricity distribution company or gas transporter.
What you can expect from your electricity distribution company.

Section 1

This section is for you if you already have an electricity supply. Here’s what to expect if you lose your electricity supply – and how soon it can be reconnected. It covers the standards of performance for electricity distribution companies in England, Scotland and Wales.

While npower is your supplier – we do meter readings and supply you with your energy bills – we are not your distribution company (it owns the wires that bring electricity to your home or business).

In line with the Electricity (Standards of Performance) Regulations 2015, we’ve set out the guaranteed standards that apply to your electricity distribution company.

The guaranteed standards are set by Ofgem, the gas and electricity regulator. You as a domestic or non-domestic customer are entitled to receive a payment if the distribution company fails to meet these standards. The distribution company can make these payments either directly to you or via npower.

In line with Section 39A (5) of the Electricity Act 1989, any guaranteed standard payments you receive won’t prejudice your entitlement to any other action or remedy that may be open to you due to your distribution company’s failure.

Sometimes the guaranteed standards may not apply. This can be due to: events beyond the distribution company’s control – such as severe weather; or the actions of third parties; or if the distribution company can’t gain access to premises or their own equipment, or they can’t identify customers affected by supply interruptions. If the distribution company claims any of these exemptions, they must demonstrate that they’ve taken all reasonable steps to prevent such circumstances from occurring and to prevent failure.

Guaranteed Standards

Regulation 5 – Restoring your electricity supply in normal weather
If your electricity supply fails in normal weather conditions due to a problem on the distribution system, the distribution company will restore it within 12 hours of them becoming aware of the problem.

You’ll receive £75 if you are a domestic customer or £150 if you are a non-domestic customer and it fails to restore it within 12 hours.

You’ll also receive an extra £35 for every extra 12-hour period that your supply is off.

Regulation 6 – Restoring your supply in normal weather where 5,000 customers or more are affected
If your electricity supply fails in normal weather conditions due to a single incident on the distribution system that affects 5,000 premises or more, the distribution company will restore it within 24 hours of it becoming aware of the problem.

You’ll receive £75 if you are a domestic customer or £150 if you are a non-domestic customer and it fails to restore it within 24 hours.

You’ll also receive an extra £35 for every extra 12-hour period that your supply is off – up to a maximum of £300.

Regulation 7 – Restoring your electricity supply in severe weather
If your electricity supply fails in severe weather conditions due to a problem on the distribution system, the distribution company will restore it within the period shown below, as prescribed by the regulation:

<table>
<thead>
<tr>
<th>Category of severe weather</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category 1 (medium events)</td>
<td>Lightning events – when a distribution company experiences at least 8 times the normal amount of higher voltage faults in 1 day – supplies will be restored within 24 hours</td>
</tr>
<tr>
<td></td>
<td>Non-lightning events – when a distribution company experiences 8 or more but fewer than 13 times the normal amount of higher voltage faults in 1 day – supplies will be restored within 24 hours</td>
</tr>
<tr>
<td>Category 2 (large events)</td>
<td>Non-lightning events – when a distribution company experiences at least 13 times the normal amount of faults in 1 day – supplies will be restored within 48 hours</td>
</tr>
<tr>
<td>Category 3 (very large events)</td>
<td>Any severe weather events where a very large number of customers are affected – supplies will be restored within a period as calculated using a formula based on the number of customers affected as set out in the Regulations</td>
</tr>
</tbody>
</table>
If the distribution company fails, it will arrange for you to receive £70 (both domestic and non-domestic customers). You’ll also receive an extra £70 for each extra 12 hours your supply is off – up to a maximum of £700. Payments will be made as soon as reasonably practicable.

**Regulation 8 – Rota Disconnections**
Very occasionally there may be a shortage of electricity supply in your local area and so your supply may need to be interrupted on a rota basis, so that the available load is shared out. The distribution company always aims to keep the impact of this to a minimum.

It will ensure that you’re not without electricity for more than a total of 24 hours due to this rota disconnection. If you’re without supply before the rota disconnections start, this is covered by the appropriate Regulations - 5, 6 or 7.

You’ll receive £75 as a domestic customer or £150 as a non-domestic customer if your distribution company fails the above standard.

**Regulation 10 – Multiple Interruptions**
You’re entitled to £75 compensation if your electricity supply fails because of a distribution system problem leaving you without power for 3 or more hours on four or more different occasions in any 12-month period starting on 1 April.

You must make a valid claim for this payment within three months of year ending 31 March. Just give the address of the premises affected and the dates of the electricity supply failures. Incidents can’t be included if a payment for them has already been made.

**Regulation 11 – Distribution company’s Fuse**
Your distribution company will come to your premises within 3 hours, if you report information to it so that it believes there may be a failure of the main fuse between the incoming supply cable and your meter. It’ll come to you within 3 hours on weekdays if you notify it between 7am and 7pm.

It’ll come to you within 4 hours at weekends and bank holidays if you contact it between 9am and 5pm. Outside of these times, it’ll view your call as if it had received it at the start of the next working day.

You’ll receive £30 compensation if it fails to meet these times.

**Regulation 12 – Informing you about a planned supply interruption**
Your distribution company will give you at least 2 days’ notice of a planned interruption.

As a domestic customer you can claim £30 – or €60 if you’re a non-domestic customer – within 1 month of a failure to give 2 days’ notice or if it switches your electricity off on a different day.

**Regulation 13 – Voltage Complaints**
Your distribution company will send an explanation about any problems with the voltage of electricity to your premises within 5 working days of you reporting it. Or it may offer to visit your premises to investigate within 7 working days.

You’ll receive £30 compensation if it fails to adhere to these timescales.

**Regulation 17 – Appointments**
You’ll be offered a morning or afternoon appointment within a two-hour time slot, if the distribution company needs to visit your premises, or if you request that it visits you. This standard doesn’t apply to visits involving connections work.

You’ll receive £30 compensation if it fails to make or keep such an appointment.

**Regulation 19 – Notification of Payment under Guaranteed Standards**
Your distribution company will notify you, or your electricity supplier (that’s us), of any guaranteed standards which it’s failed to meet – except those where you need to make a compensation claim. It’ll send payment either directly to you, or to npower to pass onto you, within 10 working days of becoming aware of the failure.

This timescale doesn’t apply to failures under Regulation 7 – restoring your supply in the event of severe weather. Compensation payments for failures under this regulation will be made as soon as reasonably practicable.

You’re entitled to an extra £30 in compensation if the distribution company fails to notify you or us of any standards it hasn’t met, or if any compensation payments are delayed.

**Claiming compensation**
To make a claim under any of the above regulations applying to your distribution company, please call its general enquiries number – listed in “How to contact your electricity distribution company” on page 20 of this document. It’ll give you details on how to claim.

Claims made outside the office hours listed are treated as having been made on the next working day.

You may refer your case to Ofgem, if you can’t reach an agreement with your distribution company over whether you are entitled to compensation.

**Contacting your electricity distribution company**
If you need any more information about the guaranteed standards, or if you want to know more about the services of your distribution company, just call them on the number on page 20 of this document.

Unsure of who your distribution company is? You can find out by looking at an electricity bill from your supplier (us).

Calls or emails to your distribution company outside office hours are treated as having been received at the start of business on the next working day.
Codes of Practice
Your electricity distribution company will have an official code of practice describing its customer services – including those for anyone who is blind, deaf or hearing impaired, those who rely on electricity for health reasons, and those who require a password for appointments. Copies of your distribution company’s codes of practice can be requested free of charge or can be downloaded from its website.

How to make a complaint
Your distribution company’s complaints-handling procedure can usually be found on its website. You can also get in touch with it on the general enquiries number on page 20 to ask how to make a formal complaint.

If your distribution company has sent you their ‘final position’ letter or they haven’t been able to resolve your complaint within eight weeks, you can take your complaint to Ombudsman Services: Energy - there to help resolve disputes between energy companies and their customers. It’s free to use their services, and they’re totally independent – so they don’t take sides, and make their decision based only on the information available. If you agree with their decision, your distribution company has to act on what they say.

Register your complaint online at ombudsman-services.org/energy or call 0330 440 1624.

What you can expect from your electricity distribution company.

Section 2

This section is for you if you want to set up a new or enhanced connection. It covers the standards of service for electricity distribution companies in England, Scotland and Wales.

To supply energy to your home or business, we work with electricity distribution companies who own the wires and cables that connect it to the grid. These distribution companies are not responsible for taking meter readings or billing you for your electricity consumption, but they are expected to meet the guaranteed standards required by Ofgem for metered demand and generation connection services.

It’s important for you to know what to expect from your distribution company. Otherwise you might not know who is responsible for a problem and where compensation might be due.

In this guide, we’ll set out the standards relating to getting a connection to its system with which your distribution company must comply. In part A, we summarise the Electricity (Connected Standards of Performance) Regulations 2015, in relation to metered demand connections – and the Direction under Distribution Licence Condition 15A, in relation to generation connections. Part B summarises the above regulations insofar as they relate to unmetered connections.

A. Standards relating to connections to properties with a metered supply of electricity

Where the standards do not apply
The guaranteed standards set by Ofgem may not apply if:

• Your distribution company is unable to meet them due to exceptional circumstances, events beyond their control, industrial action, third party action or if they can’t access the premises to complete work. If they invoke any of these exemptions, they must show that they have taken all reasonable steps to prevent such circumstances and to prevent failure.

• The connections work has been completed by an independent connections provider.

• Reinforcement is required due to the installation of approved equipment – such as small scale generation – at domestic premises or small businesses where no modification to the physical connection is required and no connection charge is made.
The relevant demand standards will apply where a new demand connection includes the installation of a single small scale generation unit (SSEG). The relevant generation standards will apply where a new demand application includes the installation of multiple SSEG generation or large scale (G59) generation.

Guaranteed standards for generation connection
Your distribution company offers certain guarantees on their key connection services. These apply to new or modified connections, although works that are solely associated with moving your meter are only included as part of ‘modified connections’ for Budget Estimates, Quotations and the Quotation Accuracy Scheme.

Provision of Budget Estimates
If you request a desk-top budget estimate of connection costs, the distribution company will provide it within the timescales below. These timescales begin after you’ve given them all the information they need and paid any applicable fees.

Please note: timescales may be different if your distribution company needs to visit your property to make a budget estimate.

You’ll receive a budget estimate within 10 working days if the required capacity of the connection is less than 1MVA (Mega Volt Amp). Anything above this and the estimate will be provided within 20 working days.

You will receive £65 compensation if your distribution company fails to keep to these timesframes.

Provision of Quotations
Your distribution company can provide you with a quotation (i.e. a formal offer of terms) for a connection after they’ve all the information they need, and after you have paid them any applicable fees. This will be provided within the timescales below left.

You are entitled to a fixed amount of compensation for each working day that the distribution company is late with these timeframes.

Quotation Accuracy Scheme
This only applies if you’re asking for a quotation for small-project demand connections or a single LV service demand connection.

You can challenge the accuracy of your quotation with the Quotation Accuracy Scheme. Your distribution company will make a fixed payment if your quotation is found to be inaccurate or incomplete. It will give you a correct quotation and refund you any overpayment that you’ve made. You’ll need to repay an additional amount if your distribution company has undercharged you.

Contacting you about scheduled work and completing work for single LV service and small LV projects demand connections
After you’ve given your distribution company written acceptance of its quotation and paid the full amount, you’ll be contacted within 7 working days so it can arrange dates to carry out the work.

Sometimes when it first contacts you, it may not be possible to agree dates, e.g. if consents and wayleaves are needed.

Please note: works associated with moving meters are not covered by this standard.

You’ll receive £15 for each working day if your distribution company fails to contact you.

Once a date is agreed to complete the works – or a phase of works specified in the quotation – this may be varied at your request or as agreed or notified by your distribution company, e.g. if the planned works are postponed due to severe weather; or if there are delays in obtaining wayleaves or other consents, or if prerequisite works haven’t been completed.

Your distribution company will complete the works on the agreed date.

It will pay you £35 for each working day that it’s late.
Contacting you about scheduled work and commencing and completing work for all other LV connections, HV and EHV connections

After you’ve given your distribution company written acceptance of its quotation and paid the full amount – or the specified amount for phases of work in the quotation – it will contact you to arrange dates to carry out the work.

Sometimes when it first contacts you, it may not be possible to agree dates, e.g. if consents or wayleaves are needed.

You’ll receive the following fixed amount for each working day it’s late if it fails to contact you:

Complaints

Please contact your distribution company if you’ve a complaint about any aspect of its service. Contact details can be found on page 20.

If your distribution company can’t resolve the issue with you – and you’re either a domestic or small business customer – you can refer it to the Ombudsman Services: Energy. It offers free and independent dispute-resolution advice. It will look at your complaint, but will expect you to allow your distribution company to try to sort it out first. You can contact them by calling 0330 440 1624 or visiting ombudsman-services.org/energy

B. Standards relating to connections to equipment which do not have a metered supply of electricity

This part sets out the standards for unmetered services to street lighting or street furniture provided by the distribution company that owns the electricity wires and cables by which electricity is supplied to your equipment.

These standards apply to authorities responsible for street lighting and street furniture, referred to in this document as “you”.

These standards do not apply to schemes involving more than 100 units of street lighting or other street furniture, or street lighting or street furniture schemes requiring HV works.

These standards do not apply if you have entered into a separate bilateral agreement with the distribution company in respect of performance standards.

Sometimes the standards may not apply including:

- under exceptional circumstances
- or due to events beyond its control
- industrial action
- actions of third parties
- not being able to gain access to its equipment
- New Roads and Street Works Act 1991 restrictions
- or where the total number of units of street lighting or other street furniture for which you have requested quotations, in the current month exceeds 115% of the monthly average for the last calendar year.

If any of these exemptions are invoked, your distribution company will need to demonstrate that it had taken all reasonable steps to prevent the circumstances occurring and to prevent failure.
Unmetered Connection Standards

Fault Repairs
If you notify your distribution company of a fault repair affecting your unmetered equipment that needs to be carried out by it, it will respond in the following timescales. If it fails to meet the standard it will make the appropriate payment.

If it fails it will pay you £15 for each working day it’s late.

<table>
<thead>

<td>Restore supplies within 20 working days</td>
</tr>
<tr>
<td>Single-unit fault repair to street lights or street furniture</td>
<td>Restore supplies within 25 working days</td>
</tr>
</tbody>
</table>

Provision of Quotations for New Works
If you ask your distribution company for an individual quotation for a connection scheme outside its published standard charges, it will provide this within 25 working days from when you have given it all the information that it needs and paid it any applicable fees.

If it fails it will pay you £15 for each working day it’s late.

Completing New Works

(a) Works on a New Site
Once the distribution company receives written acceptance of its quotation, you have paid the full amount quoted, and you have confirmed that any prerequisite works for which you are responsible have been completed (e.g. erecting street lighting columns), it will agree a date to complete the requested scheme. Once a date is agreed to complete the works, this may be varied by your request or agreement or as notified by your distribution company (for example due to delays in obtaining permits, local authority restrictions or other access problems, or if severe weather causes it to postpone planned works). It will complete the works on the agreed date.

If it fails it will pay you £15 for each working day it’s late completing the scheme.

(b) Works in an Existing Adopted Highway
Your distribution company will complete the requested scheme within 35 working days provided that any prerequisite works for which you are responsible have been completed (e.g. erecting street lighting columns). This may be varied by your request or agreement or as notified by your distribution company (for example due to delays in obtaining permits, local authority restrictions or other access problems, or if severe weather causes it to postpone planned works).

If it fails it will pay you £15 for each working day it’s late completing the scheme.

Notification of Payment under Guaranteed Standards
If your distribution company fails to meet any of the standards it will pay you by cheque, electronic transmission or as a credit to your connection invoice if it fails to meet any of the standards. It’ll pay you within 10 working days of the failure (for budget estimates); or of a quotation being found to be inaccurate or incomplete (for the Quotation Accuracy Scheme); or of completion of the job (for all the other standards in this document).

You’ll receive an extra £65 if it fails to make the payment within the above timescales.

Disputes
If you can’t resolve a dispute with your distribution company about whether you should receive a payment, you can refer the case to Ofgem, to ask for it to give you a formal decision.

In line with Section 39A (5) of the Electricity Act 1989, any guaranteed standard payments you receive won’t prejudice your entitlement to any other action or remedy that may be open to you due to your distribution company’s failure.
How to contact your electricity distribution company

Please call the relevant number if you want more information about any of the guaranteed standards, or if you would like to request a service from your distribution company.

Unsure who your distribution company is? Just look at your electricity bill from your supplier (us).

Please note: if you call or email it outside of normal working hours, it will treat your enquiry as being received from the start of normal working hours, it will treat your enquiry as being received from the start of normal working hours.

These standards also cover where it’s accepted requests for quotations and estimates by phone.

What you can expect from your gas transporter

Customer standards of performance for gas transporters

Gas transporters (GTs) own the network of pipes that supply gas to your property. We work with them to ensure you receive a constant, uninterrupted supply of gas. As they’re responsible for maintaining the network – and therefore the continuity of supply – they’re required by the government to deliver certain standards of service.

All gas transporters in Britain must adhere to the guaranteed standards of service set out by Ofgem. These standards help to ensure that you are treated fairly and that you receive the right level of service.

The standards cover:
• Restoration of supply
• Reinstatement after work at your premises
• Providing alternative heating and cooking facilities for priority domestic customers
• Responding to complaints
• Notifying you of planned work where there’s an interruption of your gas supply
• Connection services

You may be entitled to compensation if your gas transporter fails to meet any of these standards.

This document includes information on your gas transporter’s standards of performance and the compensation payments you’re entitled to if they failed to meet these standards.

As well as these guaranteed standards, Ofgem sets Licence Conditions of the minimum service standards that gas transporters must meet. For example, a gas transporter is measured in its response to phone calls made to the National Gas Emergency Service and the time it takes to respond to gas emergencies.

Guaranteed Standards of Performance

In most cases, compensation payments for failure to meet Ofgem’s guaranteed standards are paid automatically. But some standards require you to make a compensation claim should your gas transporter fail to meet them. These standards are shown on the next page:

Guaranteed Standards of Performance

<table>
<thead>
<tr>
<th>Guaranteed Standard (GS)</th>
<th>Standard Description</th>
<th>Compensation for failure</th>
</tr>
</thead>
<tbody>
<tr>
<td>GS1. Supply restoration</td>
<td>If you are a domestic customer and your gas supply is interrupted as a result of a failure, fault or damage to your GT’s pipeline system you will be reconnected/ gas will be available at your property within 24 hours.</td>
<td>If you are a domestic customer and the GT fails, you will receive a payment of £30, and £30 for each additional complete 24 hours you are without gas, up to a maximum of £1,000. If you are a non-domestic customer (and your annual gas consumption does not exceed 73,200kWh), the payment will be £50 for the failure and £50 for each additional complete 24 hours you are without gas, up to a maximum of £1,000. If you are a non-domestic customer and your annual gas consumption exceeds 73,200kWh, you are entitled to similar payments but under alternative arrangements.</td>
</tr>
<tr>
<td>GS2. Reinstatement of customer’s premises</td>
<td>If the GT initiates work on your premises, your premises will be permanently re-instated within 5 working days of the completion of the engineering work.</td>
<td>If the GT fails you will receive a payment of £50 if you are a domestic customer, and £50 for each succeeding period of 5 working days thereafter.</td>
</tr>
<tr>
<td>GS3. Heating and cooking facilities for priority domestic customers</td>
<td>If you are registered on your supplier’s Priority Service Register and your gas supply is interrupted, you will be provided with alternative heating and cooking facilities within 4 hours, or if more than 250 customers are affected, within 8 hours. (8pm-8am excluded).</td>
<td>If the GT fails you will receive a payment of £50 if you are a non-domestic customer, and £50 for each succeeding period of 5 working days thereafter.</td>
</tr>
<tr>
<td>GS13. Notification in advance of planned supply interruptions</td>
<td>When the GT carries out planned work to replace pipes or maintain the integrity of the gas system, they may need to interrupt your gas supply. If so, your GT will inform you of the date they expect to interrupt you and the reason why your supply needs to be interrupted, at least 5 working days before the interruption occurs.</td>
<td>If the GT fails and you inform them of the their failure within 3 months of the interruption, you will receive a payment of £24.</td>
</tr>
<tr>
<td>GS14. Responding to Complaints</td>
<td>If you complain to a GT in writing or over the phone, the GT will respond substantively to your complaint within 10 working days of receiving your complaint. However, if the GT needs to visit your premises or get additional information from a third party to enable resolution of the complaint, it will issue an initial written response within 10 working days to explain this situation and will then respond substantively within 20 working days from receipt of the complaint.</td>
<td>If the GT fails you will receive a payment of £20, and £20 for each succeeding period of up to 5 working days thereafter, up to a maximum of £100.</td>
</tr>
</tbody>
</table>
Guaranteed Standards for Connections

In the following tables you’ll find the guaranteed standards for new connections and service alterations. As well as these standards, your gas transporter is required to meet Ofgem’s Licence Conditions – under Standard Special Condition D10 of their Licence – in 90% of cases.

### Guaranteed Standards for Connections

<table>
<thead>
<tr>
<th>Guaranteed Standard (GS)</th>
<th>Standard Description</th>
<th>Compensation for failure</th>
</tr>
</thead>
<tbody>
<tr>
<td>GS4. Provision of standard quotations (up to 275kWh)</td>
<td>If you request a standard quotation from your GT for a new connection or an alteration to an existing connection up to and including a rate of flow of 275kWh, the GT will issue it within 6 working days.</td>
<td>If the GT fails you will receive a payment of £10 and an additional £10 for each succeeding working day up to the quotation sum or £250 whichever is lowest.</td>
</tr>
<tr>
<td>GS5. Provision of non-standard quotations (up to 275kWh)</td>
<td>If you request a non-standard quotation from your GT for a new connection or an alteration to an existing connection up to and including a rate of flow of 275kWh, the GT will issue it within 11 working days.</td>
<td>If the GT fails you will receive a payment of £10 and an additional £10 for each succeeding working day up to the quotation sum or £250 whichever is lowest.</td>
</tr>
<tr>
<td>GS6. Provision of non-standard quotations (greater than 275kWh)</td>
<td>If you request a non-standard quotation from your GT for a new connection or an alteration to an existing connection exceeding a rate of flow of 275kWh, the GT will issue it within 21 working days.</td>
<td>If the GT fails you will receive a payment of £20 and an additional £20 for each succeeding working day up to the quotation sum or £500 whichever is lowest.</td>
</tr>
</tbody>
</table>

Note for GS4, GS5 & GS6: these standards do not apply where the information you provided to your GT was incorrect or incomplete or where consents are required from third parties.

### Guaranteed Standard (GS) | Standard Description | Compensation for failure
---|---|---
GS10 Provision of commencement & substantial completion dates (greater than 275kWh) | If the GT receives an accepted quotation for a new connection or an alteration to an existing connection exceeding a rate of flow of 275kWh, it will offer a planned date within 20 working days for commencement and substantial completion of this work. | If the GT fails you will receive a payment of £40 and an additional £40 per working day thereafter up to the quotation sum or £500 whichever is lowest. |
GS11 Provision of commencement & substantial completion dates (greater than 275kWh) | Where the GT has agreed a substantial completion date for a new connection or an alteration to an existing connection it will meet that date. However, this does not necessarily mean that gas will be available for use inside the premises as the fitting of a meter, which will enable the flow of gas, must be arranged by you and your chosen gas supplier. | If the GT fails, you will receive a payment related to the value of the contract and a payment for each working day thereafter up to a maximum level. Your contract will be allocated to one category of the table below and payments will be made in line with that category up to the relevant cap. |

### Contract Value | Payment | Cap
---|---|---
Up to & incl. £1,000 | £20 | The lesser of £200 or the contract sum
Up to & incl. £4,000 | Lesser of £100 or 2.5% of contract sum | 25% of the contract sum
Up to & incl. £20,000 | £100 | 25% of the contract sum
Up to & incl. £50,000 | £100 | £5,000
Up to & incl. £100,000 | £150 | £9,000

**Note:** for GS9, GS10 & GS11 these standards do not apply where you have specifically asked your GT to delay the work.

### Payments

<table>
<thead>
<tr>
<th>Guaranteed Standard (GS)</th>
<th>Standard Description</th>
<th>Compensation for failure</th>
</tr>
</thead>
<tbody>
<tr>
<td>GS12 Notification and payments under the Guaranteed Standards.</td>
<td>Where a GT has failed any of the above Guaranteed Standards or the Connections Guaranteed Standards they will write to inform you (or your supplier) and make the payment within 20 working days of compensation becoming due.</td>
<td>If the GT fails to contact you and make required payment in time you will receive a payment of £20 in addition to any payments made under the other Guaranteed Standards.</td>
</tr>
</tbody>
</table>

For failures under GS1, GS2, GS3, GS13, GS14 and GS12 payment(s) will be made either directly to you or via your gas supplier who is obliged to forward this payment to you. For failures under GS4-GS11 the payment(s) will be made directly to you.

---

25
Exclusions to Guaranteed Standards

Please note: there are certain exclusions, agreed by Ofgem, where the guaranteed standards in the previous tables may not apply.

These exclusions include events beyond the gas transporter’s control – such as severe weather, industrial action, damage caused by the customer, actions by third parties, legislative constraints – and labour disputes.

The standards may also not apply if the gas transporter is unable to gain access to your premises or can’t complete work for safety reasons.

If your gas transporter invokes any of these exclusions, it will need to demonstrate that it’s taken all reasonable steps to meet the standard.

Licence Conditions

All gas transporters listed in this document must meet the standards set out in Ofgem’s Licence Conditions on an annual basis. As well as meeting the 90% standard for connections work, they must meet the Licence Conditions described in the following table:

<table>
<thead>
<tr>
<th>Licence Condition</th>
<th>Definition</th>
<th>Annual Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard Special Condition D10 – Quality of service standards</td>
<td>Telephone calls to the National Gas Emergency Service (which operates 24 hours a day), the general enquiry line and the meter point reference number helpline (during the hours which they operate) shall be answered within 30 seconds of the call being connected.</td>
<td>90%</td>
</tr>
<tr>
<td>Paragraph 2(f) – Responding to telephone calls</td>
<td>Where a GT receives a report of a gas escape or other gas emergency, including a significant escape of carbon monoxide or other hazardous situations, it shall attend as quickly as possible within the following timescales: (a) All uncontrolled escapes/gas emergencies within 1 hour; (b) All controlled escapes/gas emergencies within 2 hours.</td>
<td>97%</td>
</tr>
</tbody>
</table>

You can find the actual performances of each gas transporter for the period 1 April 2018 to 31 March 2019 in the table on the following page.
**Some terms explained**

<table>
<thead>
<tr>
<th><strong>Domestic customer</strong></th>
<th>A customer whose gas supply is taken wholly or mainly for domestic purposes.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Non-Domestic customer</strong></td>
<td>A customer whose gas supply is taken wholly or mainly for non-domestic purposes.</td>
</tr>
<tr>
<td><strong>Priority customer</strong></td>
<td>A domestic customer who has been identified to the GT by a registered gas supplier in accordance with their licence conditions, as having special needs. If you think you should be on this list please contact your gas supplier.</td>
</tr>
<tr>
<td><strong>Controlled gas escape</strong></td>
<td>Where the person reporting the escape, or someone on their behalf, has taken all the actions advised by the emergency call centre agent and can no longer smell gas.</td>
</tr>
<tr>
<td><strong>Uncontrolled gas escape</strong></td>
<td>Where the person reporting the escape, or someone on their behalf, has taken all the actions advised by the emergency call centre agent and can still smell gas.</td>
</tr>
</tbody>
</table>

**Other services provided for gas customers**

Each GT provides various services for priority and vulnerable customers. They must comply with certain requirements when visiting customer premises and must have in place a procedure for dealing with any complaints. These services are described in a statement(s) produced by each GT. You can get a copy free of charge by contacting the GT, or download a copy from their website.

**NATIONAL GAS EMERGENCY SERVICE:**

365 days a year, 24 hours a day

Smell gas? Call free on **0800 111 999**

(Minicom/textphone **0800 371787**)

All calls are recorded and may be monitored for training purposes.
Need to contact us?

We’re here to help you

Visit: npower.com
Call: 0800 073 3000
Minicom/textphone: 0800 413 016

Our contact details are always printed on your bills. Our UK call centres are open 6 days a week: Monday to Friday 8am to 8pm, and Saturday 8am to 6pm.

Need an interpreter?
That’s okay, we can get an interpreter for you when you contact us.

Type too small?
To have your bills and leaflets in large print or Braille, just ask for the Priority Services on:

0808 172 6999
(Minicom/textphone: 0800 413 016)

Correct at time of publishing online August 2019

Phone calls: We may monitor and/or record calls for security, quality or training purposes. Calls to 0800 numbers should be free from all mobiles and generally free from all landlines. Calls to 0330 numbers will cost you no more than 01 or 02 numbers from landlines or mobiles. If you get ‘inclusive minutes’ with your package, calls to 0330 numbers will be part of these.
